a sub-fund of Vontobel Fund

This fund is managed by Vontobel Asset Management S.A., which is part of Vontobel Group.

This fund is authorised in Luxembourg and regulated by the Commission de Surveillance du Secteur Financier (CSSF).

Objectives and investment policy

This actively managed sub-fund aims to achieve the best possible investment returns in EUR through investing in the lower part of the EUR investment grade corporate debt universe.

- The sub-fund mainly invests in interest-bearing securities, money market instruments and up to 10% each in contingent convertible bonds (so-called CoCo-Bonds) and asset-backed securities or mortgage-backed securities (ABS/MBS). The sub-fund may also hold cash.
- The sub-fund mainly invests in securities with a lower investment grade rating, denominated in EUR that are issued by public and/or private borrowers.
- The sub-fund may use derivatives to achieve the investment objective and for hedging purposes.
- The portfolio manager can make investments for the sub-fund at his or her own discretion within the predefined investment limits.
- Any income generated will be reinvested and included in the value of your shares.
- The charges for buying and selling securities are paid by the sub-fund. They are payable in addition to the charges listed and reduce the sub-fund's return.

- You can redeem shares in the sub-fund on any day on which the banks in Luxembourg are open for normal business (i.e. excluding Saturdays, Sundays, Good Friday, 24 December, 31 December and public holidays). Exceptions are days when exchanges or markets on which an essential part of the sub-fund's portfolio is traded are closed.

Risk and reward profile

The indicator above does not signal the risk of a potential loss, but indicates the fluctuations in the sub-fund's share price in the past.

- The share class is assigned to this category because its share price can fluctuate moderately due to the investment policy applied.
- The historical data used to calculate the profile cannot be used as a reliable guide to the future risk profile of the sub-fund.
- The risk category shown is not guaranteed and may change.
- Even the lowest risk category is not entirely free of risk.

When assigning a sub-fund's share class to a risk category, it may be the case that not all risks are taken into account. Such risks include risks in connection with exceptional market events, operational errors, legal and political events. You can find a detailed list of the risks in the "Notice regarding special risks" section in the general part of the sales prospectus. The following risks have no direct influence on this category, but may still be important:

- The credit quality of the securities that the sub-fund invests in can deteriorate. This means there is a risk that the issuer of the securities cannot meet its obligations. The value of this investment may fall if an issuer's credit rating is downgraded.
- Using derivatives results in corresponding counterparty risks.
- The use of derivatives generally creates leverage. The sub-fund is also subject to corresponding valuation risks and operational risks.
- Asset-backed and mortgage-backed securities, and their underlying receivables are often intransparent. The sub-fund may also be subject to a higher credit and/or prepayment risk.
- CoCo-Bonds may entail significant risks such as coupon cancellation risk, capital structure inversion risk, call extension risk.

Charges

The charges you pay are used to pay the costs of running the fund, including the costs for managing, marketing and distributing it. These charges reduce the return on your investment.
